## TECHNICAL DATA SHEET

| Item                            | REDISPERSIBLE POLYMER POWDER |
|---------------------------------|------------------------------|
| Recommend Application           | Construction Use Only        |
| Appearance                      | White powder                 |
| Solid content (%)               | ≥98.0                        |
| Degree of fineness%             | ≤10.0                        |
| Bulk Density (g/L)              | 400-600                      |
| Particle size (μm)              | 80-120                       |
| PH                              | 5-9                          |
| Ash Content%                    | 15%±2                        |
| Lowest film-forming temperature | 0°C                          |
| Glass Transition temperature    | 16°C                         |
