

Color fixing agent LSF-01

Product name: formaldehyde-free fixative LSF-01

Chemical composition: Cationic polymer

Specification:

Appearance	Light yellow to red brown viscous liquid
Solid content (%)	39-41
Viscosity (cps, 25°C)	8000-20000
PH (1% water solution)	3-7
Solubility:	Soluble in cold water easily

Concentration and viscosity of solution can be customized according to customers' needs.

Characteristics:

1. The product contains active group in molecule and can improve fixing effect.
2. The product is free of formaldehyde, and is environment-friendly product.

Applications:

1. The product can enhance the fastness to wet rubbing of reactive dye, direct dye, reactive turquoise blue and dyeing or printing materials.
2. It can enhance the fastness to soaping, laundering perspiration, crocking, ironing and light of reactive dye or printing materials.
3. It has no influence on the brilliance of dyeing materials and colored light, which is propitious to the production of staining products in accurate accordance with the standard sample.

Package and storage:

1. The product is packed in 50kg or 125kg, 200kg net in plastic drum.
2. Keep in dry and ventilated place, away from direct sunshine .
3. Shelf life: 12 months.
