

KANGHUA CHEMICAL CO., LTD

Metal Protective Fluid (HRA)

Formula: $C_7H_5ClN_3Na$

CAS No.: 202420-04-0

MW: 189.58

Properties: It is golden yellow to amber liquid solution, soluble in water, chloroform, benzene, toluene and other organic solvents, with a lower alcohol, ethylene glycol miscible in any proportion.

Usage: This product can be used as the antirust and corrosion inhibitor of copper and alday, and widely used for the cycle water treatment agent. It also can be used with manifold scale inhibitor and sterilization algacide, and it works as corrosion inhibitor very well especially in the closed cycled cooling water system.

Packing: 200-250kg / Plastic Drum, 1200kg/IBC

Specifications

Item	Specification
Appearance	Yellow to amber liquid
PH Value	12.2~14.0
Solid, %	28%~34%
Specific Gravity@20°C, g/cm ³	1.07~1.21
