#### Inhalation:

Remove to fresh air. Get medical attention for any breathing difficulty.

#### Ingestion:

If large amounts were swallowed, give water to drink and get medical advice.

## Skin Contact:

Wash exposed area with soap and water. Get medical advice if irritation develops.

## **Eye Contact:**

Immediately flush eyes with plenty of water for at least 15 minutes, lifting upper and lower eyelids occasionally. Get medical attention if irritation persists.

## 5. FIRE FIGHTING MEASURES

#### Fire:

Flash point: 138C (280F) CC

Autoignition temperature: 433C (811F)

Flammable limits in air % by volume:

lel: 1

As with most organic solids, fire is possible at elevated temperatures or by contact with an ignition source.

#### **Explosion:**

Fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

#### Fire Extinguishing Media:

Water spray, dry chemical, alcohol foam, or carbon dioxide.

#### **Special Information:**

In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

# . ACCIDENTAL RELEASE MEASURES

Remove all sources of ignition. Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Spills: Clean up spills in a manner that does not disperse dust into the air. Use non-sparking tools and equipment. Reduce airborne dust and prevent scattering by moistening with water. Pick up spill for recovery or disposal and place in a closed container.

## 7. HANDLING AND STORAGE

Keep in a tightly closed container, stored in a cool, dry, ventilated area. Protect against physical damage. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product.

# B. EXPOSURE CONTROLS/PERSONAL PROTECTION

## Ventilation System:

Not expected to require any special ventilation.

## **Personal Respirators (NIOSH Approved):**

Not expected to require personal respirator usage.

#### **Skin Protection:**

Wear protective gloves and clean body-covering clothing.

#### **Eye Protection:**

Use chemical safety goggles and/or a full face shield where splashing is possible. Maintain eye wash fountain and quick-drench facilities in work area.

## **Other Control Measures:**

There is insufficient data in the published literature to assign complete numerical SAF-T-DATA\* ratings and laboratory protective equipment for this product. Special precautions must be used in storage, use and handling. Protective equipment for laboratory bench use should be chosen using professional judgment based on the size and type of reaction or test to be conducted and the available ventilation, with overriding consideration to minimize contact with the chemical.
