2-Methylheptyl Laurate (2-EHL)

DESCRIPTION

2-EHL is a highly purity oil ester formed by esterification of dodecanoic acid and isocececl ester. This product has extremely good permeability, At present, this product is a product produced by our company that can replace the import and its quality exceeds the import.

PRODUCT IDENTIFICATION

INCI Name: 2-METHYLHEPTYL LAURATE

CAS No: 84713-06-4

ITEMS	SPECIFICATION
Appearance	A colorless or slightly yellow oily liquid
Ester content	≥98
Acid value	≤0.5
Hazen (Color)	≤30
Refractive index	1.443-1.447
Product Form	Liquid
Packaging	175 kg steel drum /850kg

STORAGE

The product may be stored for 24 months from the date of manufacture in the unopened original Container. Keep container tightly closed under cool and light proof conditions.

Once opened, use contents quickly. Store for up to 6 months after opening.

PROPERTIES

- as a medicinal excipient. Do external drug solvent and transdermal promoter, replace vegetable oil, as a lubricant, matrix, used for the preparation of ointment and cream.
- This product is a cosmetic oil raw material, lubricating oil additives, permeability agent
- This product can be used in the edible essence
- This product has excellent permeability and is an auxiliary material for high-grade ink paint.
- It is recommended to use in stamping oil solvents (air conditioning aluminum wing oil), base oil and additives in the metal processing industry, and solvent-based cleaning agent and water-based cleaning liquid..
